R SHAMGANESH

Bangalore, India
rshamganesh@gmail.com — 8217856602 — GitHub — Portfolio — LinkedIn

Summary

Final-year IT student experienced in building scalable full-stack applications with Java, React, Django and Next.js. Delivered production features for a live platform serving 100+ registered users, and shipped 20+ REST APIs across two independent full-stack projects.

Education

Bachelor of Technology in Information Technology 2023 - 2027
RMK Engineering College, Kavaraipettai CGPA: 7.04

Technical Skills

Frameworks & Libraries: React, Next.js, Node.js, Django, React Native
Databases: SQL, Firebase, Convex
Developer Tools: Git, GitHub, Postman, VS Code
Core Concepts: DSA, OOPs, REST APIs, Authentication, System Design

Experience

Intern - Full Stack Development — EDAINFRONT Jun 2025 - Jul 2025

- Built a full-stack membership management platform using React and FastAPI as part of a 6-member team, now serving 100+ registered families for a charitable trust.
- Designed and implemented REST APIs for registration, authentication, and membership workflows.
- Optimized backend query handling through efficient routing and database access, improving API response performance.
- Collaborated with frontend and backend developers to deliver responsive web and mobile experiences.

Projects

Nestorix - Property Maintenance SaaS 2026
Django, Python, React, React Native, SQL

- Designed and developed a multi-role SaaS platform supporting three user types (tenants, contractors, and property owners) for digital maintenance request management.
- Built 10+ REST APIs to automate maintenance request creation, assignment, prioritization, and tracking.
- Implemented secure role-based authentication and authorization across all user roles.

AI-Powered Adaptive Learning Platform 2026
Next.js, Convex, Gemini API, Web Crypto

- Built a privacy-first AI-powered adaptive learning platform with end-to-end encrypted data pipelines and zero plaintext storage.
- Enabled local processing of PDF files up to 5 MB for AI-powered content adaptation without exposing user data to servers.

Leadership & Responsibilities

Vice Chair - IEEE Consumer Technology Society (CTS) — Student Chapter

- Supported the planning and execution of technical workshops, seminars, and student events.
- Coordinated with faculty members and student volunteers to organize IEEE chapter activities.

Achievements

- Winner, Envision 2026 (SSN Engineering College) led a 4-member team to win a 24-hour hackathon among 25 competing teams (100 participants), earning an INR 10,000 cash prize.
- Grand Finalist, Stratify 3.0 National Startup Competition.
- Published an IEEE research paper on an AI-powered Fashion Recommendation System.

Certifications

- Artificial Intelligence Foundation (Proctored) Infosys Springboard
- Introduction to Internet of Things NPTEL (Elite Certification)
